

Establishing Rules

Why Rules Matter

Clear rules set expectations for player behavior and make it easier to handle disputes. Without them, moderation becomes inconsistent and prone to backlash.

Crafting Server Rules

1. **Be Clear and Concise**

- Avoid overly complex language.
- Example: "No griefing or stealing from other players."

2. **Cover Core Topics**

- Player respect: No harassment or hate speech.
- Gameplay fairness: No cheating or exploiting bugs.
- Resource usage: No spamming or lag-inducing builds.

3. **Display Rules Prominently**

- Add them to your server's spawn area using signs or books.
- Include rules on your server's website or Discord channel.
- Use EssentialsX to set up the `/rules` command.
