

Setting Up Moderation Tools

Essential Plugins/Mods

1. For Java Servers:

- **EssentialsX**: Manage chat, permissions, and more.
- **LuckPerms**: Advanced permission system for staff and players.
- **LiteBans**: A powerful plugin for banning, muting, and kicking players with an easy-to-use web interface.
- **Your Preferred AntiCheat**: Detect and prevent cheating.

Anti-Grief Tools

- **WorldGuard**: Protect specific areas from being modified.
- **GriefPrevention**: Allow players to claim land and prevent others from altering it.
- **CoreProtect**: Rollback changes caused by grievers.

Communication Moderation

- **Chat Moderation Plugins**:
 - **ChatControl**: Filter offensive words and detect spam.
 - **DiscordSRV**: Connect your Minecraft chat to a Discord server for easier oversight.
