

Changing Eggs via the Panel

Changing the egg for your server allows you to switch the server's configuration template. This can provide more control over your server environment and ensure compatibility with the selected server type.

Switching eggs is rarely needed but can be useful in specific scenarios, such as switching between server types or versions.

- [Changing Eggs](#)

Changing Eggs

Access the Settings Menu

1. Log in to the **Ridgeline Servers Control Panel** at <https://panel.ridgelineservers.com/>.
 2. From your server dashboard, click on your server to open its management interface.
 3. Navigate to the **Settings** tab in the left-hand menu.
-

Change the Egg

1. In the **Settings** tab, locate the **Change Egg** section.
 2. Use the dropdown menu to select the new egg you want to use.
For example:
 - **PaperMC** for optimized performance.
 - **Forge** for running modded servers.
 - **Vanilla** for an unmodified Minecraft experience.
 3. Click **Apply** to confirm the change.
-

Restart Your Server

1. Navigate to the **Console** tab in the panel.
 2. Click **Restart** to apply the new egg configuration to your server.
-

Notes on Switching Eggs

- **Data Preservation:** Changing the egg does not delete your existing world or files. However, certain server types (like modded vs. vanilla) may require adjustments to your world or mods to ensure compatibility.
 - **Compatibility:** Ensure the selected egg matches the server type you want to run. For example, a modded world will not run properly on a Vanilla server type.
 - **Advanced Control:** Changing eggs gives you greater control over the server's configuration but is not typically required for most setups.
