

Enabling Keep Inventory

Method 1: Enable Keep Inventory Using In-Game Commands

Step 1: Use the Game Rule Command

1. Ensure you are logged into the game with operator permissions. (*Note: Operator permissions are required to use this command.*)
2. Open the in-game chat by pressing the `T` key.
3. Type the following command:

```
/gamerule keepInventory true
```

This command enables the Keep Inventory rule for all players on the server.

In some cases, you may need to run the command separately while in each dimension (Overworld, Nether, and End).

Step 2: Verify the Change

1. Test the change by dying in-game.
2. Ensure your items and experience levels are still with you after respawning.

Method 2: Enable Keep Inventory Using the Server Console

Step 1: Run the Command in the Console

1. Open the **Ridgeline Servers Control Panel** at <https://panel.ridgelineservers.com/>.
2. Navigate to the **Console** tab.
3. Enter the following command and press `Enter`:

```
gamerule keepInventory true
```

Step 2: Verify the Change

Test the change by dying in-game to ensure the Keep Inventory rule is working as intended.

In some cases, you may need to run the command separately for each dimension (Overworld, Nether, and End). Use the below commands in the server console.

```
execute in minecraft:overworld run gamerule keepInventory true  
execute in minecraft:the_nether run gamerule keepInventory true  
execute in minecraft:the_end run gamerule keepInventory true
```

This ensures the Keep Inventory rule applies globally across all dimensions.
