

Temporary Bans

If you want to ban a player temporarily, you can specify the duration of the ban.

Step 1: Use the `/tempban` Command

1. Open the Chat or Console

Run the following command from either chat or the console.

2. Type the `/tempban` Command

The format for a temporary ban is:

```
/tempban <player> <duration> [reason]
```

- `<player>` is the player's username.
- `<duration>` is the amount of time for the ban (e.g., `30m` for 30 minutes, `1d` for one day, `2w` for two weeks).
- `[reason]` is optional.

Example:

```
/tempban Notch 1d Breaking server rules
```

This will ban **Notch** for 1 day with the reason "Breaking server rules."
