

Setting Up Whitelisting

1. Log into Your Server Control Panel:

- Open your web browser and go to panel.ridgelineservers.com.
- Enter your login credentials to access the control panel.

2. Access the Server Configuration:

- Once logged in, select your Minecraft server from the list of available servers.
- Navigate to the **Settings** or **Configuration** section, depending on your control panel layout.

3. Enable Whitelisting:

- Look for the option labeled **Whitelist** or **Whitelisting**.
- Set the whitelist option to **True**.
- Save your changes.

4. Restart the Server:

- Navigate to the **Console** or **Server Control** section.
- Click the **Restart** button to apply the changes.
