

# Installing The Mods

## Step 1: Check Your Server Type

1. Log into the [Ridgeline Servers Control Panel](#).
  2. Navigate to your server and check the server type under **Settings**.
  3. If needed, reinstall your server with the **Forge** or **Fabric** type.
- 

## Step 2: Download the Mods

1. Visit trusted mod repositories like CurseForge or Modrinth.
  2. Download `.jar` files for the mods you want to install.
  3. Ensure all mods are for the correct Minecraft version and server type.
- 

## Step 3: Upload Mods to the Server

1. Log into the **Ridgeline Servers Control Panel**.
  2. Navigate to **Files > mods**.
  3. Use the **Upload** button to add your mod `.jar` files to the **mods** folder.
- 

## Step 4: Restart Your Server

1. Return to the **Console** tab in the control panel.
  2. Restart your server to load the mods.
  3. Check the console logs for any errors related to the mods.
- 

## Step 5: Test the Mods

1. Join your server in Minecraft and test the mods to ensure they're working correctly.
2. Look for any missing functionality or server errors.

---

# Troubleshooting

- **Server Crashes on Startup:**
  - Verify the mod versions match your Minecraft server version.
  - Ensure all dependencies (like Fabric API) are installed.
- **Mods Aren't Loading:**
  - Check that the mods are in the correct **mods** folder.
  - Restart the server to apply changes.
- **Incompatibility Issues:**
  - Some mods may conflict with others. Test mods individually to identify problematic ones.

---

## Additional Help

If you encounter any issues or need further assistance, open a support ticket via the [Billing Area](#). Our support team is ready to assist you.
