

# Managing Your Installed Modpack

## 1. Verify Installation:

- Navigate to the **Files** section in the control panel to confirm the modpack's files are installed.
- Look for folders like `mods`, `config`, or specific modpack-related files.

## 2. Start Your Server:

- Return to the server dashboard and click **Start**. Your server will now run the installed modpack.

## Tips for Using Modpacks

- **Check for Compatibility:** Ensure your modpack version matches the server's Minecraft version.
- **Backup Before Installing:** Always back up your server data before installing or switching modpacks.
- **Modpack Updates:** To update a modpack, uninstall the old version, and install the new one.
