

# Selecting and Installing a Modpack

## 1. Choose a Modpack Platform:

- The installer supports the following platforms:
  - **Modrinth**
  - **CurseForge**
  - **Feed The Beast**
  - **Technic**
  - **ATLauncher**
  - **Voids Wrath**
- Click the platform to browse its available modpacks.

## 2. Search for a Modpack:

- Use the search bar to locate a specific modpack or browse through the options.
- Each entry provides details, including a description, version, and supported Minecraft versions.

## 3. Select a Version:

- Click on your desired modpack to view available versions.
- Choose a version compatible with your server and click **Install**.

## 4. Wait for Installation:

- The control panel will download and configure the necessary files automatically.
- When complete, you'll see a notification indicating that your modpack is ready.
